

FOR IMMEDIATE RELEASE

**MISYS SBM SHOP FLOOR CONTROL NAMED 2010 ‘AWESOME QUICKBOOKS ADD-ON’
THE SLEETER GROUP NOTES SUPERIOR DESIGN AND INTEGRATION**

Woodstock, Vermont (Nov. 10, 2009) – MISys SBM Shop Floor Control has been honored by The Sleeter Group as one of its 2010 “Awesome Add-ons for QuickBooks.” The award recognizes MISys SBM Shop Floor Control as one of the most productive and effective technologies that enhance the world’s most popular business management software. MISys SBM is a Microsoft .NET-based manufacturing system designed to provide inventory planning, purchasing, and production control for manufacturing firms with fewer than 100 employees. The MISys SBM Shop Floor Control module allows manufacturers to accurately predict production costs based on estimated material, labor, and overhead, and it allows them to capture, track and analyze actual material, labor, and overhead costs. Shop Floor Control provides Tool, Work Center, Shop Operations and Capacity management.

As the largest network of QuickBooks consultants, The Sleeter Group has members throughout the United States, Canada and Europe. The awards were formally announced at the Next Generation Accounting Solutions Conference in Orlando, Florida, an annual event that showcases businesses management tools and technologies to consultants and accounting professionals who serve business clients.

“MISys SBM Shop Floor Control is ‘awesome’ because it fills a niche that many QuickBooks users in the manufacturing industry need,” said Doug Sleeter, the founder of The Sleeter Group. “As the most widely-used small business accounting software, there is an incredible demand

from users for the software to do just about everything.” Add-on products are essential to many small and mid-sized businesses, providing them with the specific tools and functions they need.

Of the hundreds of technologies that are designed to enhance QuickBooks, MISys SBM Shop Floor Control was one of only nine selected as an Awesome Add-on for 2010. “Its superior integration with QuickBooks, overall design, outstanding features and conformance with appropriate accounting standards make it an effective solution for many businesses.”

“It is a great honor to be selected by the Sleeter Group as one of the awesome add-ons for 2010”, said David Brown, President & CEO of MISys Inc. “MISys SBM and the Shop Floor Control module offer a great productivity boost for QuickBooks users who are manufacturers. It can save them over 25% on inventory holding costs alone and provides full time-phased MRP capabilities for automated creation of purchase orders and production orders,” he said. “MISys SBM is the only add-on that gives QuickBooks industrial-strength manufacturing capabilities.”

“Before awarding the ‘awesome’ label, The Sleeter Group’s staff considers several factors that consultants and business owners need answers to,” Sleeter added. Products selected for the honor must meet the following criteria:

- Show superior design, implementation and features.
- Integrate with QuickBooks using best practices of the QuickBooks SDK programming guidelines;
- Use appropriate transaction types and field population for recording data into QuickBooks so as to preserve and/or enhance the standard reporting features in QuickBooks; and
- Conform to good accounting principles and operating standards.
