

FOR IMMEDIATE RELEASE

MISYS® ANNOUNCES SMALL BUSINESS SOLUTION FOR SAGE ACCPAC ERP SOFTWARE

WOODSTOCK, Vermont (May 10, 2009) – Manufacturing Information Systems (MISys, Inc.) today announced its intent to position MISys Small Business Manufacturing (MISys SBM) as the solution of choice for users of Sage Accpac accounting software with fewer than 50 employees. MISys SBM is focused on integrating with Sage the 100 and 200 Editions of Sage Accpac ERP.

MISys Manufacturing for Sage Accpac ERP (aka MISys SAE) was first released in 1986 and has since been installed at over 7,000 sites in 48 countries. The product works only with Sage Accpac accounting software and has been sold exclusively by Accpac resellers in North America, Africa, Asia, Australia and the UK. A cost-reduced version of MISys SAE, called Small Business Edition, was released in 1995 to address the lower end of the Accpac market.

In 2006, MISys, Inc. announced the release of a new product called MISys Small Business Manufacturing (MISys SBM) which integrates with multiple small-business accounting products including Sage Peachtree Accounting and Sage Simply Accounting.

Last Fall, MISys released a version of MISys SBM which, among other things, features seamless integration with two small business-oriented accounting products from Sage, plus mid-market leader Sage Accpac ERP. The imminent release of MISys SBM version 4.0, which adds a Shop Floor Control module to the SBM product line-up, substantially duplicates the functionality available in its flagship product MISys SAE, except at a lower cost.

Effective June 1, 2009, MISys SAE Small Business Edition is no longer available, being replaced by MISys Small Business Manufacturing.

Scott Beavers, VP Sales & Marketing, comments “For the past year we have been working hard to educate our existing channel partners on the MISys SBM product, preparing everyone for what is required to sell, install and support software in what is, for some, a new market segment. Just as we have done over the last 2 decades with the mid-market MISys SAE product, MISys, Inc. is committed to working closely with our partners to ensure they remain an integral and critical element in the marketing of our MISys Small Business Manufacturing product. We hope our channel partners will make MISys SBM an important part of their business offerings.”

Current MISys Business Partners will have the option to be grandfathered into the new partner program. Beavers and his associates are hosting a special 2-day live training workshop for Sage solution providers just prior to the Sage Insights 2009 Conference in Nashville, TN. After Insights, additional on-line training on all aspects of MISys SBM will be available to MISys partners.

“Today marks the culmination of many months of effort on the part of the MISys Development and MISys Marketing teams, all designed to expand the reach of our product beyond the traditional Accpac universe” remarked Dave Brown, MISys President and CEO. He adds “Because MISys SBM is an industrial-strength solution, but with a much lower total cost of ownership, we can better serve the growing number of MISys partners who themselves are reaching beyond the mid-market.”
